ABOUT US

Jordan Computer Trading Co. (JOCOM) Is one of the early computer companies to be established in Jordan. It was founded in 1978 when the personal computer was not even born, and over more than forty years the company has grown from a few people to well over 50 employees between administrators, engineers, experts, and technicians. This growth was accompanied by the growth of the company's turnover, which was reflected in the quantity and quality of new products and services offered to our customers and clients.

OUR STRATEGY

Vision

To be a leader in the information technology industry by providing enhanced hardware and software products, business solutions, and technical support.

Mission

Build long-term relationships with our customers & clients and provide exceptional customer services by pursuing business through innovation and advanced technology.

Purpose

Build long-term relationships with our customers & clients and provide exceptional customer services by pursuing business through innovation and advanced technology.

WHAT WE OFFER

We work hard to help industries achieve their goals and realize cost savings every step of the way. Whether our client needs fast access to essential technologies or the support of technical experts for the strategic planning and development of solutions, JOCOM is here to help.

We don't only sell hardware products but also seize to provide integrated solutions to ease its customers' daily work as well as increase their productivity and profitability.

In addition, we offer hardware, custom-made software, and ERPs, and we are also one of the best technical support service providers one can find in the market.

If you are not sure of the type of technology you need for your business, we have expert staff dedicated to that purpose only. They can assist in finding the right product or service for any inquiry you may have. After all, we only provide you with state-of-the-art latest technologies.

SCOPE OF WORK

Banking Solutions

The range of products and services we offer to banks from Automated Teller Machines (ATMs), and Applicant Tracking Systems (ATSs) to monitoring & anti-fraud systems are unique and built on their requirements, they help modernize the services banks provide their clients with as well as create a superior customer experience.

Software Applications

Our skilled specialists know the game of business and deliver successful solutions that accord with all the specified requirements while invariably staying within time and budget limits.

Office Technologies

The range of products we provide includes, but is not limited to, printers, scanners, projectors, IP telephones, digital signage screens, and many more solutions that achieve industries and entities' goals.

SCOPE OF WORK

Technological Education

The range of products we provide the market with is comprised of Projectors, interactive projectors, interactive boards, tablets, lecture recording systems, large-format printers, scanners, and many more.

Networking Infrastructure

We offer various services and products to our clients are but not limited to structured cable designs & installations, patch panels, cabinets, switches, routers & access points, UCMs, network attached (NAS) storage, and furnishing telecom and server rooms.

Kiosk Solutions

After deploying a high number of Automated teller machines (ATMs) in Jordan, we decided to move up and start deploying kiosk machines, such application consists of but is not limited to; bill payment, card issuance, card acceptance, document printer & reader, HR systems, border security solutions, and multi-functional banking solutions.

○ ○ ○ ○ **DIEBOLD NIXDORF**

Diebold Nixdorf is an American financial self-service, security, and services corporation internationally engaged primarily in the sale, manufacture, installation, and service of self-service transaction systems (such as ATMs and currency processing systems), point-of-sale terminals, physical security products (including vaults and currency processing systems), and software and related services for global financial, retail, and commercial market.

○ ○ ○ ○ EPSON

EPSON is a Japanese electronics company and one of the world's largest manufacturers of computer printers, and information and imaging-related equipment.

The company manufactures inkjet, dot matrix, laser printers, scanners, business, multimedia, and home theatre projectors, large home theatre televisions, robots, and industrial automation equipment.

○○○○ **Dahua**

Dahua Technology is a world-leading video-centric smart IoT solution and solution provider in IP cameras, NVR, HD CCTV cameras, Analog, PTZ, and other vertical solutions, AIoT and IoT digital intelligence platforms, video collaboration, smart fire safety, automotive electronics, smart storage, smart security check, smart display, smart control, smart thermal imaging, etc.

○○○○ ViewSonic

ViewSonic Corporation is a leading global provider of computing, consumer electronics, and communications solutions, its headquarters in the United States, and a research & development center in Taiwan.

Her products include LED monitors, interactive commercial displays, touch displays, smart displays, and projectors.

○ ○ ○ ○ MATICA

MATICA is a German company that develops, manufactures, and distributes solutions to issue passports, financial cards, ID cards, Nano-SIM, and Micro SIM cards.

The company offers a vast range of products from centralized systems and mailers to ID printers and laser desktop machines.

ROWE is a specialist German Corporation for wide-format Scanners, Multifunctional wide format printers, controllers, folding systems & machines, and cutting technology.

○ ○ ○ ○ *Kodak Alaris*

Kodak Alaris is a British leading provider of traditional photographic supplies, hardware and software for digital imaging and information management, and retail printing kiosks.

○ ○ ○ ○ ROTOTYPE

Rototype is an Italian firm, established in 1962, that offers solutions to the banking systems to improve their operational processes, and supplies complete systems, hardware, and software, to meet customer requirements like ATM systems, Cheque printers & scanners, self-service KIOSK machines, and provides professional services to assist in the implementation of software solutions.

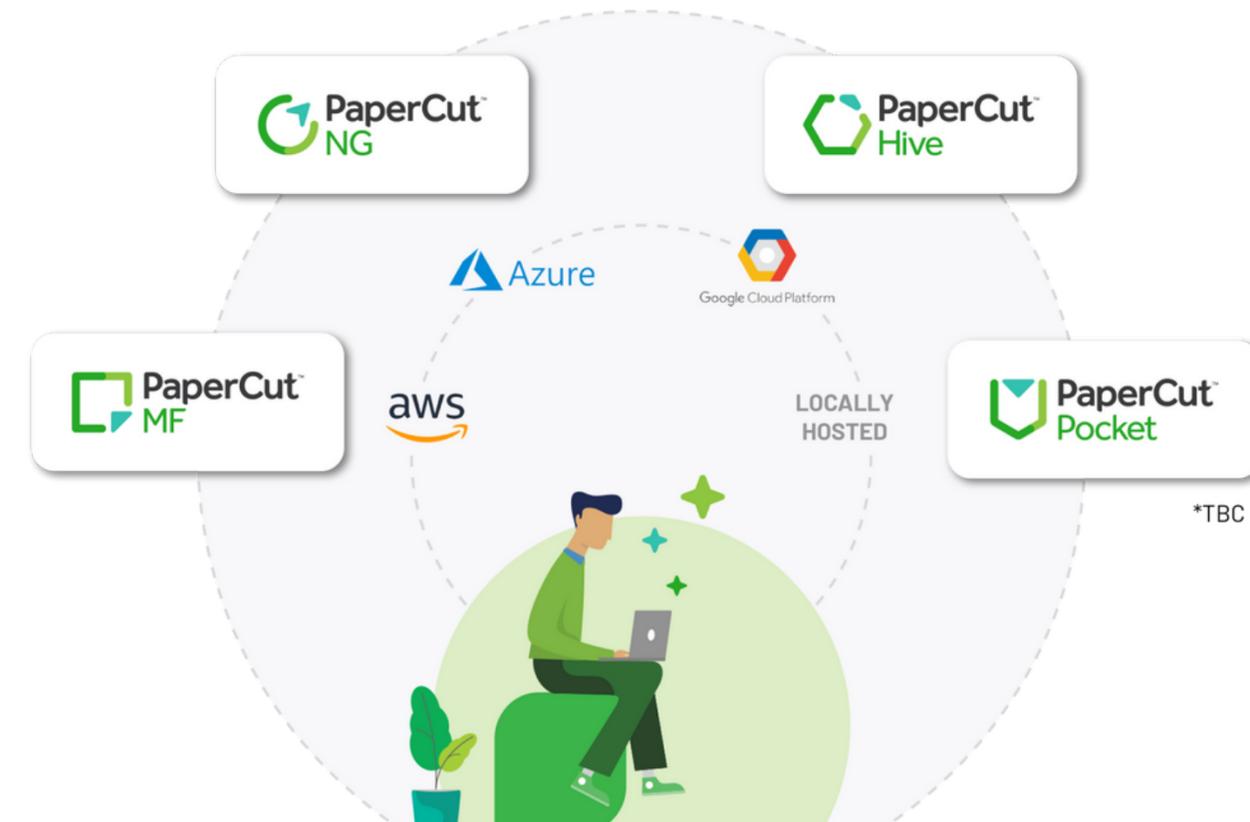

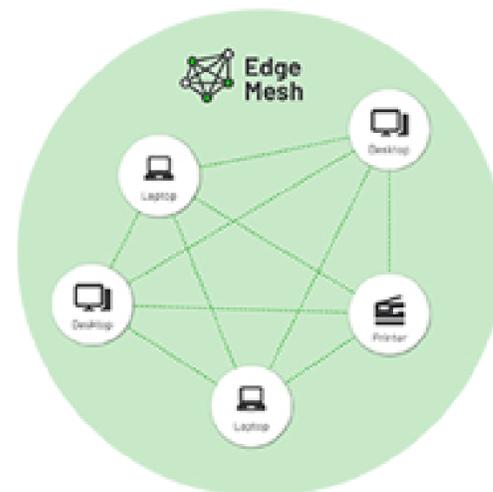

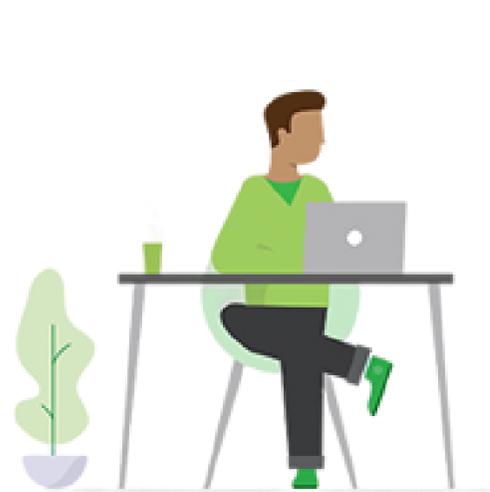

Odoo is a suite of business management software tools including CRM, e-commerce, billing, accounting, manufacturing, warehouse, project management, and inventory management to name a few. The Community version is a libre software, licensed under the GNU LGPLv3. The Enterprise version has proprietary extra features and services. The source code for the framework and core ERP modules is curated by the Belgium-based Odoo S.A. Odoo is available for both on-premise and ready to use SaaS environment.

○○○○ PaperCut

PaperCut allows organizations to track, control and optionally charge for the printing and copying performed by users.

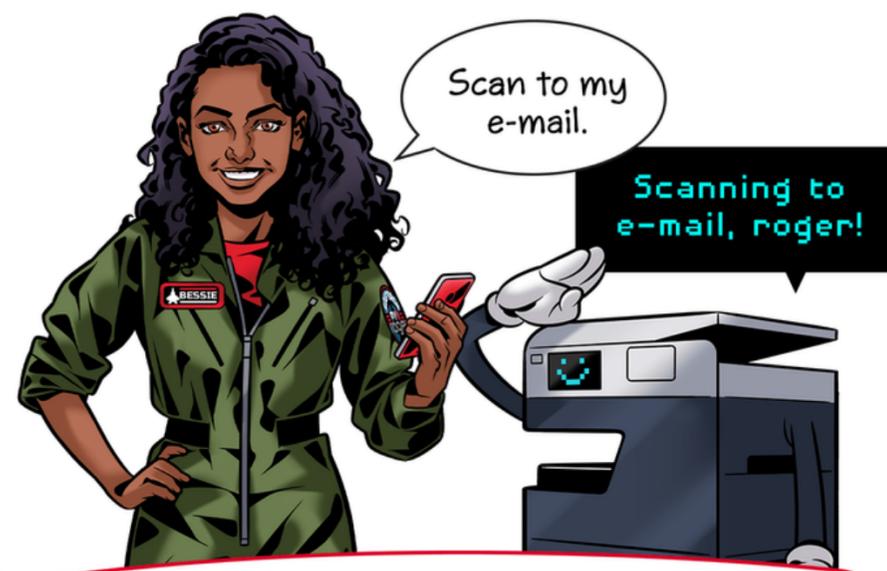

The implementation of a solution reduces paper and toner waste, cuts costs, and reduces environmental impact. It can also make both users and departments more accountable for their paper output.

○○○○ *MyQ Print Management Solution*

MyQ is a print management solution that helps businesses and individuals to automate, streamline, accelerate the pace of workflow digitization, and more effectively support their printer fleet, to make their daily activities be more convenient, secure, and cost-effective and to allow them to focus on what they do best by helping them create their own individualized user experience – whether this is in a large corporate office, in a hospital, at a school library, or even in a home office.

Available on

○ ○ ○ ○ **Zebra**

Zebra is a technology company that specializes in providing hardware and software solutions to improve operational efficiency and enhance customer experiences across various industries. Their products range from rugged mobile computers and barcode scanners to RFID technology and software solutions for inventory management, asset tracking, and data analytics. With a focus on innovation, quality, and reliability, Zebra helps businesses optimize their operations and make better-informed decisions.
